Re: The University of North Texas
Bruce Dining Hall
Denton, Texas

Dear Barry,

I have been meaning to write you to thank you and your team at Aerowerks for the terrific job you did for me and my client at UNT. I cannot believe how well this challenging project went without a hitch. My client is ecstatic about how well the accumulator, lift and feed from the lift at the lower level to the flight machine work. It really is amazing given the complexity and all of the demands on the system. They are so proud of this system that it is part of their tour of the dining facility. Everyone who sees it cannot believe how well everything is built, fits together and operates so flawlessly.

Aerowerks has hit a home run with this system and I would never hesitate to duplicate this system again given the same difficult site conditions we experienced at UNT with the tight spaces, two levels and staffing (to operate the entire system).

I truly appreciate you taking this assignment head on when other companies would not. Aerowerks will be my first choice and recommendation to my clients when it comes to accumulators and lifts. Feel free to use me and UNT as a reference for any clients wanting to know how to get the job done right!

Regards,

Orlando Espinosa
